Status Available

For all commands except for AutoAnswerDelay, AutoAnswerMode, AutomixerGateStatus, CallDuration, CallStatus, CallerExtension, CallerID, CallerName, DanteTemperature, DigitalOutputStatus, DoNotDisturb, and GroupMeterLevel, Update should be called only once since the command's status will be updated automatically as the device's status changes. ConnectionStatus, AutomixerGateSet, AutomixerGateStatus, CallerID, and MacroStatus do not support the Update function. ConnectionStatus is triggered by the device providing a successful response to other Update function calls.
